Safety Instructions:

- The cabinet must be positioned stably to prevent it from tipping over.
- The locking system must function properly to prevent unauthorised access; keep keys safe or obtain replacements.
- Avoid overloading the shelves beyond the recommended load capacity of 50 kg.
- When assembling, disassembling, lifting and transporting (approx. 65 kg) the cabinet, take suitable protective measures to avoid injury.
- Keep the hinges and moving parts cleaned regularly to avoid malfunctions.
- Use the lock to secure the contents of the cabinet against unauthorised access.
- Keep out of reach of children, as the cabinet is not a toy and improper use can cause injury.
- Take care when opening the doors to avoid injury; do not open the doors with excessive force.
- Distribute heavy loads evenly to avoid overweighting and damage.
- Avoid excessive heat or moisture to ensure material integrity.
- Install and use in accordance with the instructions provided to ensure safety and functionality.
- Do not place heavy objects on the doors to prevent damage and possible injury.
