Article Numbers: 403149, 403147, 403146, 403145, 403142, 403141

Safety Instructions:

- Pull the cabinet along the intended edge with minimal force to prevent it from tipping over.
- Use the push bar lock and the cylinder lock to prevent unauthorised access.
- Keep heavy objects evenly distributed on the shelves to avoid overloading.
- Ensure that the doors are fully closed before moving or loading the cabinet.
- Carry out regular inspections to ensure the integrity of the hinges, locks and the stability of the shelves.
- If necessary, secure the cabinet to the wall, especially in environments with a high risk of accidents, to prevent it from tipping over.
- Only use additional shelves in accordance with the maximum load capacity (up to 50 kg per shelf).
- The cabinet should not be used to store flammable or hazardous substances.
- The cabinet should only be used for its intended purpose in order to minimise safety risks (not as a ladder or seat).
- The manufacturer's instructions must be observed during installation and use.
- Sharp edges can form on surfaces, beware of injuries.
- Due to its weight, the product can only be moved by at least two people.
- Ensure that the cabinet is standing on a stable, level surface to prevent it from wobbling or tipping over.
- Do not exceed the maximum load capacity of the shelves of 50 kg.
- Make sure that the keys for the cylinder lock are kept in a safe place to prevent unauthorised access.
- Ensure that children are denied access to the cabinet to prevent accidents.
