Article Number: 155343

Safety Instructions:

- Avoid working under the table while the height is being adjusted to prevent injuries.
- Make sure that the worktop is blocked at the intended height before placing heavy objects on it.
- The task light should only be operated with the specified voltage to avoid overloading and the risk of fire.
- Keep the working area free of objects that could cause tripping hazards, especially at a height of 1400 mm.
- To minimise the risk of electric shock, secure all electrical appliances properly and use them only in accordance with the instructions.
