Safety Instructions:

- Read the user manual before use.
- The perforated back panel must be securely mounted on the superstructure profiles, ensure that the back panel is securely installed in the profile groove to prevent it from falling down.
- Do not exceed the maximum load capacity; avoid overloading to prevent tipping or breaking.
- Do not work on sharp edges and corners to avoid injury; take protective measures.
- If the product is damaged, do not use it and contact the manufacturer.
- The perforated back panel is not suitable for use by children and should be kept out of their reach. Keep children away from its use, as small parts may be present in the installation area.
- Before mounting, ensure that the perforated back panel is correctly screwed into the system groove and that all parts are firmly and securely fastened to prevent accidents.
- Regularly check the stability and fastenings of the perforated back panel to prevent it from falling off unintentionally during use.
- Ensure that assembly is carried out in accordance with the instructions to ensure stability. The product is only to be used for its intended purpose in accordance with the instructions.
- Ensure that suitable safety measures are in place for installation in commercial areas.
- The perforated back panel is only intended for indoor applications and is not suitable for use in damp or wet environments.
- Avoid electric shocks due to improper use if electrical components are integrated.
- Not suitable for children under 3 years due to small parts.
- Avoid injuries when attaching or removing the perforated back panel.
