Safety Instructions:

- Install the shelf according to the instructions and ensure that it is securely fastened to ensure safe use.
- Wear safety goggles and suitable personal protective equipment to protect yourself from sharp edges or parts during assembly or use.
- Before use, check that the load-bearing capacity of the shelf is not exceeded and that overloading is avoided to ensure stability.
- Observe child safety: Keep the product out of the reach of children and protect it from sharp edges and moving parts.
- Check the product regularly for wear and tear or damage before use to ensure safety.
- Only use the shelf for its intended purpose and not as a ladder, and do not place any sharp or heavy objects on it.
- Ensure that the shelf is securely hooked into the system perforation and that it is used on a non-slip surface.
- When mounting on inclined surfaces, ensure that the shelf is securely fixed and make sure that there is no risk of crushing when attaching the support arms.
- Observe weight load limits and avoid overfilling to prevent injuries and maintain stability.
- When making changes or modifications to the product, consult the manufacturer and only use recommended additional parts to guarantee safety.
- Observe the information on safe assembly and use in the instructions and ensure that there is no risk of breakage, tipping over or suffocation in the event of improper assembly.
