

Product Safety Information

Silo container type SG-D 375, with drive-in pockets, painted

Please note the technical data of the products!

Article Numbers: 308724, 308723, 308722, 308721, 308720

Safety Instructions:

- Only move the silo container on firm, level and stable surfaces to prevent it from falling.
 - Avoid overloading the silo container and do not exceed the maximum capacity of 375 litres to prevent structural damage and tipping.
 - Use the swivel and fixed castors properly to ensure stability and regularly check their stability and the frame for wear or damage.
 - Wear personal protective equipment, including safety shoes, gloves and safety goggles, to avoid injury, especially when handling bulk materials.
 - Keep the silo container away from sources of ignition to avoid the risk of fire.
 - Take care when handling, especially on smooth surfaces, to avoid the risk of slipping and injury.
 - Use suitable forklift trucks and observe cautious driving practices to prevent collisions and accidents.
- Watch out for blockages in the entrance pockets.

- Store the silo container safely and stably after use and keep it away from children.
- Observe safety precautions when connecting to tractors.
- Ensure that the silo container is secured before loading and unloading.
- Watch out for sharp-edged parts and only use suitable tools for the slide lock to avoid damage.
