

Product Safety Information

Silo container type SG-D 600, with entry lugs, galvanised

Please note the technical data of the products!

Article Number: 308731

Safety Instructions:

- Caution: When loading and unloading the silo container, ensure that no persons are in the vicinity to avoid injury.
- Take safety precautions: The silo container may only be moved with a suitable and sufficiently powerful forklift truck or tractor unit.
- Avoid overloading: The maximum weight of 600 litres should not be exceeded to prevent tipping or collapse.
- Observe the handling instructions: Ensure that the sliding closure is correctly closed to prevent unintentional emptying.
- Check components regularly: Check the castors for damage to ensure functionality and safety during use.
