Safety Instructions:

- The plan cabinet must stand on a stable, level surface to prevent tipping.
- Maximum drawer load: 40 kg must not be exceeded to prevent damage and injury.
- Do not overload drawers or open them excessively quickly or backwards to prevent them from tipping or blocking.
- Only operate the central locking system with the keys provided.
- Wear protective equipment when moving the levelling cabinet.
- Ensure stability when using the plinth or base frame.
- Operate drawers cleanly to avoid the risk of crushing. Only pull out one drawer completely at a time.
- Keep the space around the cupboard clear to avoid tripping hazards.
- Keep children away from the plan cabinet; use only under adult supervision.
- Use plastic glides to protect the floor.
- Unlock the drawers completely before pulling them out fully and use the integrated pull-out stop.
- Do not pull out more than 4/5 of the drawers to avoid excess weight.
- Use the ergonomic handles to open the drawers.
- Keep the cabinet away from sources of water to prevent rust from forming on the steel structure.
- Cupboards are not suitable for children - make sure they do not play or climb on them.
- Full-extension drawers should be used with caution.
- Keep drawers closed when not in use.
- Regularly check drawers for proper function and service if necessary.
