### Safety Instructions:

- Sensitive storage units must always be protected during external transport or in the storage room to prevent damage.
- Lids must sit securely and stably on the crate to prevent them from falling, tipping over or slipping and to avoid injuries.
- Avoid using small parts or sharp edges to prevent injuries.
- The correct use of the lids must be in accordance with the safety guidelines and the recommended specifications.
- The products are made of plastic; follow the instructions for safe disposal and recycling.
- There is a risk of damage, breakage or injury if the lids are handled incorrectly. Remove the lid during transport to avoid damage or accidents.
- Keep the item out of the reach of children; it may pose a choking hazard if played with carelessly.
- Avoid excessive loading or inappropriate stacking of the lid as this can lead to instability, damage or injury.
- The use of the lid requires the correct stacking technique. The lid does not serve as protection against contents falling out.
- Do not use the lid as a safety feature, seat or standing surface to avoid injury.
- The product can only be used with the intended EURO size boxes; use with others requires the recommended specifications.
