Safety Instructions:

- Observe the maximum load capacity of 150 kg. Use only for persons weighing up to 150 kg. The synchronised mechanism may not function properly if the chair is loaded above the recommended weight of 150 kg.
- Safely adjust the height of the armrests to prevent injuries. Adjust the height of the armrests to prevent neck and shoulder strain. Height-adjustable armrests can cause injuries if used incorrectly.
- When used by several people, adjust the settings to avoid injuries. The chair may tip over if used incorrectly, especially if it is not adjusted to the user's height.
- Safe use in accordance with the recommended sitting times of up to 8 hours. The sitting time should not exceed 8 hours to avoid health risks.
- Check the seat height and tilt regularly to ensure optimum ergonomics. Incorrect adjustment of the seat height can lead to postural problems and back pain.
- We recommend regular checks for any loose parts or damage. It is recommended that the chair is checked regularly for functions and damage.
- In the event of mechanical problems, contact the manufacturer directly.
- Do not use the chair in a standing position or for improper use.
- The fabric cover can be damaged if not cared for or cleaned properly.
- Using the chair on an unsuitable surface can impair its stability.
