Safety Instructions:

- The shelf should be placed on a stable and level surface to prevent it from tipping over.
- The maximum load capacity of 50 kg per shelf must not be exceeded in order to avoid safety risks.
- The shelf is intended for use in dry indoor areas and is not suitable for outdoor use.
- Avoid overloading the shelf to prevent structural damage and safety risks.
- Secure the shelf to the wall to prevent it from tipping over, especially when used in rooms with children or in office areas with high pedestrian traffic.
- Have the installation instructions ready and follow these instructions for safe installation.
- Ensure that all parts are present and undamaged before installation.
- Avoid using sharp objects on the surface of the shelf to prevent scratches and damage.
- Ensure that all screws and connections are firmly tightened before use.
- The shelf should be checked regularly for stability and damage.
- Not suitable for children under 3 years of age, as small parts could fall off the product.
- Consult a professional before installing the shelving to ensure structural integrity.
- If necessary, use protective measures to avoid tripping hazards.
