Article Numbers: 44898, 44894, 44890, 135274, 135273, 135272

Safety Instructions:

- Read the assembly instructions before assembly and ensure that all parts are present to prevent accidents due to improper assembly.
- The bench must be placed on a level and firm surface to prevent it from tipping over. Safe assembly is required to avoid injuries.
- Regularly inspect the stability and integrity of the bench, especially if it is used frequently. If the bench is damaged or worn, it must no longer be used.
- Do not use sharp objects or abrasive cleaning agents to avoid damaging the bench surface.
- When used in wet rooms, observe the manufacturer's specific requirements and instructions. The bench is optimised for wet rooms, but be aware of the risk of slipping.
- Observe higher weight capacity and even weight distribution. Do not exceed the maximum recommended load to avoid safety risks.
- Protect the product outdoors from weather-related damage.
- When used by children, constant supervision is required to minimise the risk of injury.
- Avoid risk of suffocation from sharp edges or protruding parts.
- Be aware of the risk of slipping on smooth surfaces, especially in wet areas.
- Before use, especially when using for the first time, check the safety and stability of the assembly.
