Safety Instructions:

- Make sure that the bench is mounted stably so that it does not tip over, especially on smooth surfaces.
- Regularly check the stability and strength of the bench and all its connections and assembled parts to prevent breakage or detachment.
- The bench should be kept dry and protected from corrosion, especially in wet rooms and when used indoors and outdoors.
- Avoid overloading: a maximum of 6 users at the same time and do not put weight on the armrests or sit on the bases.
- Designed for indoor and outdoor use, but protect against direct sunlight or extreme weather conditions and strong heat sources.
- Use only for the intended purpose in changing or wet areas; any other use may cause damage or injury.
- The changing bench is not suitable for unsupervised use by children. Use under adult supervision recommended; not for children under 3 years of age due to choking hazard.
- Carefully read and follow the installation instructions; ensure that all parts are securely and stably connected during installation.
- Avoid contact with sharp objects so as not to damage the surface.
- Ensure that all screws and connections are regularly checked for tightness to prevent accidents.
- During use, make sure that the height-adjustable feet are correctly adjusted to ensure stability on uneven surfaces.
