Safety Instructions:

- Check stability regularly to avoid accidents and tighten loose parts.
- Use non-slip feet and ensure that the bench is placed on a stable, level surface to prevent it from slipping.
- Install according to the enclosed instructions without force to avoid damage and instability.
- Keep the bench out of the reach of children when not in use, and adult supervision should always be provided when used by children.
- Carry out regular inspections for damage and contact the manufacturer or seller in the event of injuries or accidents.
- Observe safety instructions for use in wet rooms or outdoors. Avoid excessive moisture unless the product is optimised for this.
- Avoid overloading the bench and the bench should only be used for its intended purpose.
- Use height-adjustable glides to ensure stability and stability and to prevent tipping.
- Do not use the bench as a climbing aid and do not climb on hook ledges to avoid falls and injuries.
- Avoid contact with water sources to prevent rust formation in the metal parts, unless the bench is optimised for outdoor use.
- Read the instructions carefully before installation and ensure that no special tools are required.
- Advise users of the potential risk of injury due to improper use.
