Safety Instructions:

- Do not exceed the maximum surface load of 300 kg to avoid instability or structural damage.
- Take care with asymmetrical loads during height adjustment to prevent tilting or loss of stability.
- Caution: Electrical appliance; improper use or damage can lead to electric shocks. Check electrical components regularly.
- Observe maximum duty cycle: 10% (6 minutes per hour or 2 minutes continuous operation at full load).
- Choking hazard: Keep small parts and cables away from children. Do not allow children to come into contact with moving parts.
- Low-noise adjustment of the working height. Bear in mind that noise can be a nuisance in quiet environments.
- Only operate with compatible accessories.
- To avoid malfunctions or electric shocks, only operate the height adjustment mechanism with the intended control unit and in accordance with the instructions.
- Only use the product on a stable, level surface and make sure that the levelling feet ensure stability.
- Ensure that the height adjustment control is installed out of the reach of children.
- The product is not suitable for use by children. Set up in a place inaccessible to children to avoid injury.
- Do not bring into contact with water or other liquids to avoid the risk of short circuits.
- The product is intended for indoor use only and must be protected from moisture and extreme temperatures.
- Note the power consumption in standby mode (0.1 W) and disconnect the power supply before making any changes to the height adjustment.
- When adjusting the height, make sure that there are no people or objects in the adjustment range to avoid injury.
- Read and observe all installation instructions and safety data sheets.
