Safety Instructions:

- Only use the BS Vario container pump set for low-viscosity media and observe the maximum medium temperature of 50 degrees and a maximum immersion depth of 1000 mm.
- Avoid contact of the appliance with corrosive liquids such as battery acid, ammonia water, phosphoric acid and hydrogen peroxide without suitable protective equipment.
- Ensure that the motor and other electrical components are protected from water to avoid electric shock.
- Secure the appliance when filling to prevent it from tipping over and possible injury.
- Ensure that the product is used out of the reach of children and that child safety precautions are taken as it may carry hazardous liquids.
- Not suitable for use with flammable or explosive materials.
- Read all safety instructions and warnings before use.
- Wear suitable personal protective equipment when working with chemical media.
- Before operating the appliance, ensure that all connections are correct and tight.
- Do not leave the appliance unattended while it is in operation.
- Carry out regular maintenance work and inspections to ensure safe operation.
- Avoid risk of suffocation due to improper use or improper handling of the hose.
- The product requires a safe and stable power supply. If used outdoors, take suitable protective measures against weather conditions.
