Safety Instructions:

- Observe the load capacity of 1.2 to 2.5 kg and only use the product within these specifications.
- Do not use the spring balancer for tools that exceed the permissible weight or have dangerous properties.
- The spring balancer, including the safety catch, is designed in accordance with the DIN 15112 standard. Observe the safety guidelines in accordance with DIN 15112 and ensure that the fall protection is fitted correctly.
- Risk of injury from falling tools if handled incorrectly.
- Keep the work area clean and free of obstacles to avoid tripping hazards.
- Make sure that children do not have access to the product to avoid possible accidents.
- Do not use damaged parts or tools to avoid the risk of malfunctions.
- Risk of suffocation if the spring balancer is used incorrectly.
- Risk of falling due to incorrect attachment or installation of the spring balancer.
- Risk of electric shock if electrical tools are handled incorrectly.
- Be careful not to suddenly retrieve the tool.
- Only use the product in the intended area of application and do not exceed the maximum available load capacity.
