Article Numbers: 154576, 154575

Safety Instructions:

- Ensure that the spring balancer is installed correctly to minimise the risk of falling.
- Only use approved tools that are suitable for a load capacity of 7 to 10 kg.
- Regularly check the integrity of the steel cable for wear or damage.
- Secure the spring balancer during operation to prevent uncontrolled movements.
- Follow the load capacity instructions and ensure that the total weight does not exceed the permissible load capacity.
- Make sure that the return mechanism is working properly and is not damaged.
- Keep the product away from children and emphasise that it is not intended for the personal use of children.
- Risk of suffocation due to improper use or assembly.
- Mechanical hazard due to falling tools if used improperly.
- Risk of electric shock when used with electrical tools if not properly installed.
- Take safety precautions for children to minimise the risk of use without supervision.
- Observe the overwind protection to avoid damage and danger.
- Be careful with the maximum load capacity; exceeding it can lead to accidents.
