Safety Instructions:

- Only use the safety shoes in accordance with the intended use and the manufacturer's instructions.
- Make sure that the shoes are regularly checked for damage, including the sole and steel toe cap, to ensure safety.
- Wear the right shoe size to avoid pressure points and injuries and pay attention to the running-in period of the shoe.
- The shoes are not suitable for use in explosive atmospheres or with volatile, flammable liquids.
- Keep the shoes clean and dry to ensure optimum slip resistance and avoid ankle injuries.
- Protect from moisture, especially in order not to impair the ESD function, and do not use the shoes in extreme temperatures.
- Safety shoes are not suitable for leisure or fashion purposes and should be kept away from children.
- There is a risk of slipping on wet or slippery surfaces and when the sole is worn.
- The steel toe cap protects against mechanical hazards, but can pose a risk of injury if used incorrectly.
- Keep the shoes away from heat sources and avoid overheating the sole materials.
- Pay attention to antistatic properties and avoid contact with electrical equipment.
- The shoes are water-repellent, but do not offer complete protection against immersion in water; regular care is recommended.
- Ensure that the shoes are suitable for the intended use in order to minimise the risk.
