Safety Instructions:

- Protection against impacts of 200 J and crushing up to 1500 daN thanks to the plastic cap.
- Note antistatic properties to avoid electrostatic discharge and suitable for working environments with ESD requirements.
- Use only for intended conditions and applications, not suitable for unsafe applications or chemical hazards.
- The safety shoes are suitable for people in sizes 38-47, ensure correct size and fit.
- Do not use or store in damp, wet environments or environments contaminated with chemically aggressive substances, as functionality could be impaired.
- Risk of slipping in wet conditions or on slippery surfaces, select a suitable sole and surface.
- Regularly check for wear and damage, remove shoes from service if there are signs of wear.
- For safe use, always follow the manufacturer's instructions on antistatic properties and safety level S1, which means a closed heel area.
- Risk of suffocation due to improper handling with protective cap, keep out of reach of children.
- Risk of injury from improper use of the shoes, follow all instructions for use and care.
