Safety Instructions:

- Choking hazard due to improper use or small parts. Keep out of the reach of children.
- Risk of slipping on slippery or wet surfaces due to insufficient slip resistance or wear of the sole. Make sure that shoes are not wet before they are worn.
- Protection against impact and crushing thanks to the steel toe cap. Ensure the correct fit to avoid pressure points and injuries.
- Keep the shoes clean and dry to prevent the formation of bacteria and material wear. Regular cleaning is recommended.
- The shoe is not suitable for extreme temperatures or highly electrical areas. Note the antistatic properties, but be careful with impact protection.
- Not suitable for use in potentially explosive atmospheres or in the presence of naked flames.
- Regular inspection for damage or wear to the steel toe cap, puncture-resistant midsole and shoe in general to ensure safety.
- Only use the shoes on firm, level surfaces and for the intended use as described in the product description.
- Make sure that the safety shoe complies with the EN ISO 20345-S3 standard, if relevant.
- Not suitable for deep water. Prolonged exposure to water may affect the shoe.
