Safety Instructions:

- Avoid using safety shoes in extreme temperatures or when exposed to chemicals that could damage the material.
- Always wear the appropriate protective insole and ensure the correct fit to avoid foot injuries.
- Regularly check the condition of the shoes as well as the steel toe cap and other safety-relevant components for wear or damage.
- Keep the shoes clean and dry and store them in well-ventilated areas to ensure their longevity.
- Only use the shoes under the intended conditions and not beyond the recommended limits.
- Take extra care on slippery or wet surfaces to avoid the risk of slipping.
- Safety level S3 offers protection against dangerous objects and should be worn in areas with potential hazards to the feet.
- Improper use of the steel cap can lead to suffocation, so always use it correctly.
- Make sure that the steel toe cap meets the requirements of EN ISO 20345-S3.
- Regularly check the quick fastening system and laces for a secure fit.
- Wait until the shoe is dry after exposure to water to avoid health risks.
