Safety Instructions:

- Ensure that the maximum surface load of 1250 kg is not exceeded.
- Maximum surface load when the chassis is extended: 450 kg; when the chassis is not extended: 1250 kg.
- Avoid loading the workbench with the lowering mechanism while it is not in the correct position.
- Ensure that the drawers are not overloaded (max. 100 kg per drawer).
- Make sure that the workbench does not tip over when pulling out the drawers; pull out a maximum of 90%.
- Use the central locking system for the doors to prevent unauthorised access to the storage space.
- The workbench is designed for indoor use; avoid outdoor use.
- Follow the instructions for caring for the wooden surface to ensure its longevity.
- Ensure that the workbench is positioned on a stable, level surface to prevent it from tipping over or falling.
- When using the eccentric lever for height adjustment, ensure that no parts of the body are trapped.
- Make sure that the bow handles are securely fastened and undamaged.
