Safety Instructions:

- Make sure that the shoe is only used in ESD-protected areas and is suitable for this area of application.
- Choose the correct shoe size to avoid foot injuries and misalignments.
- The plastic toe cap offers toe protection. Avoid heavy objects falling onto the shoe.
- Take suitable measures to avoid the risk of slipping, especially in wet conditions or on slippery surfaces.
- Do not use the shoe in extreme temperatures or environments that may affect the material integrity.
- Check the shoes regularly for damage or wear and replace them if necessary.
- The shoes are intended for commercial use and are not suitable for private use.
- Only use the shoes for the intended area of use under the correct conditions.
- Observe the safety standards (e.g. EN ISO 20345 S1P) and ensure that the shoe complies with them.
- Avoid contact with aggressive chemicals or hot water so as not to impair the material properties.
- Keep the shoes clean and dry to preserve their properties and material integrity.
- Be aware of the risk of suffocation from the lacing system or small parts, especially if used incorrectly.
- Make sure that the shoes are correctly adjusted to prevent falls.
- Risk of head injury if the toe cap is not adjusted tight enough.
- Risk of slipping on smooth floors despite ESD-specific sole.
- If there are any signs of damage or wear, make sure you do not use the shoes.
- The shoes must not come into contact with hot liquids or harmful chemicals.
- Choking hazard for children under 3 years due to small parts in the shoe.
- The use of suitable insoles is recommended for individual customisation requirements.
- Make sure that the shoe fits properly to avoid blisters.
- Follow the care and cleaning instructions to ensure the safety and durability of the shoes.
