Safety Instructions:

- Do not load the roller shutter cabinet above the maximum load of 50 kg per shelf; place heavy objects securely to prevent them from falling over.
- Avoid contact with sharp objects to prevent scratches on the acoustic roller shutter.
- The hook bolt lock ensures secure storage; check its functionality regularly and use the specified keys.
- The roller shutter cabinet is not suitable for use by children without supervision; keep children away to avoid the risk of injury from locking or falling.
- Stability may be impaired if not installed correctly; observe the installation instructions.
- Please ensure that the cabinet is placed on a stable surface before use to prevent it from tipping over.
- Ensure protection against injuries caused by the sharp edges of the filigree 8 mm edges.
- The cabinet is not suitable for outdoor use, please only use in dry indoor areas.
- Ensure that the roller shutter is properly locked to prevent injuries caused by sudden movements.
- Avoid opening the roller shutter with force to prevent damage to the mechanisms or injury.
- The cabinet should only be used in accordance with the instructions provided in order to minimise the risk of improper use.
