Safety Instructions:

- The workbench should be placed on a stable and level surface to prevent it from tipping over.
- Observe and do not exceed the maximum surface load of 1250 kg to avoid damage.
- Do not overload the drawer; observe the maximum load capacity of 100 kg to avoid the risk of breakage and injury.
- Make sure that no fingers or hands get caught in the drawer pull-out to avoid injury.
- Operate doors and drawers with care: ensure free movement space and avoid collisions.
- Only use the central locking system with the keys provided to prevent unauthorised access.
- Keep children and vulnerable persons away from the workbench to prevent accidents.
- Regularly check the stability and proper functioning of the workbench.
- Read the user manual and safety information thoroughly before using the product.
- Avoid contact of the workbench with water or damp environments to prevent electrical and material damage.
- Use personal protective equipment (e.g. gloves) when working with sharp edges.
- The drawer should be pulled out a maximum of 90% to prevent it from being pulled out.
- In the event of installation errors or damage, contact the manufacturer immediately.
