Safety Instructions:

- Make sure that the workbench is stable and on a level surface to prevent it from tipping or falling over.
- Avoid overloading the drawers; each drawer has a maximum load capacity of 100 kg.
- Use the central locking system to secure the drawers when not in use.
- The worktop is sanded and oiled. Ensure that the worktop is non-slip when working and avoid contact with naked flames or hot objects.
- Check the anti-slip studs on the frame feet during assembly.
- Read the safety instructions and assembly instructions before use.
- Keep the workbench dry to avoid damaging the material.
- Take care with sharp objects on the surface of the workbench.
- Choking hazard due to small parts in the drawers. Avoid improper storage.
- Risk of injury due to improper handling or incorrect assembly of the workbench. At least two people are recommended for transport.
- Avoid the risk of slipping and overloading by securing and using the workbench correctly.
- The workbench is not suitable for use by children.
- Caution: Sharp edges on the worktop.
- Avoid chemical reactions: Do not use harsh cleaning agents.
