Safety Instructions:

- Ensure that the workbench is placed on a stable and level surface to avoid the risk of tipping.
- The maximum surface load of 1250 kg must not be exceeded.
- Avoid overloading the drawers, the maximum load capacity is 100 kg per drawer and they can only be pulled out up to 90%.
- The drawers should be opened and closed carefully to avoid jamming and to prevent the risk of suffocation due to improper handling of the contents.
- Children should not be near the workbench; childproof storage is recommended.
- To avoid injury, do not use the workbench improperly, especially not as a ladder.
- The anti-slip studs on the feet of the frame must remain intact and clean to prevent slipping and tipping.
- If the materials or the wooden surface are damaged, the workbench should no longer be used.
- The workbench is designed for commercial use and should not be used by untrained personnel.
- Personal protective equipment (e.g. gloves) is recommended to prevent injuries.
- Follow the installation and set-up instructions to avoid tipping over.
- Protect from the weather and water to prevent material spoilage.
