Article Numbers: 156935, 156934, 156933, 156932

Safety Instructions:

- Protection from injuries caused by sharp edges and corners.
- Observe the maximum load capacity to prevent tipping. Do not exceed the maximum surface load of 1250 kg.
- Store heavy objects securely in the drawers to prevent them from tipping away. Do not overload drawers (max. 100 kg per drawer).
- Pay attention to the stability of the workbench with uneven loads.
- Protection against crushing when opening drawers and doors. Take particular care when opening the doors when the compartments are fully loaded.
- Risk of suffocation from falling objects if handled incorrectly.
- Be careful when using sharp tools on the worktop.
- The use of personal protective equipment (e.g. gloves) is recommended to prevent injuries when working with the workbench.
- The workbench is suitable for use in commercial environments, provided it is used safely. Should be set up on a stable and level surface to prevent tipping.
- Do not lose the key system of the central locking system.
- Do not install the workbench in an unstable location or use it as a support.
- This workbench is not intended for use by children and should be kept out of their reach.
- If used improperly, the product can become unstable, which can lead to crushing or other injuries.
- Please note that the workbench is designed for professional applications and may therefore require special safety precautions.
