Safety Instructions:

- Risk of suffocation due to improper use of the armrests or loose parts/upholstery.
- Risk of falling if the seat height is incorrectly adjusted.
- Follow the instructions for safe adjustment of the backrest, seat tilt and seat height.
- Ensure that the chair is sufficiently stable on carpeted floors or smooth surfaces to prevent it from tipping or sliding.
- Regularly check the safety double castors, which are suitable for soft surfaces, to ensure safe use.
- Make sure you sit for up to 8 hours to avoid postural problems and overstraining your muscles.
- The backrest is height-adjustable and should be adjusted according to body height to ensure an ergonomic posture.
- Use the armrests to take the strain off your neck and shoulders.
- The chair should be checked regularly for wear and functionality, especially the mechanism and adjustable parts.
- Ensure that the seat and backrest are correctly locked to prevent unintentional movement.
- Ensure that the chair is stable on the floor to avoid the risk of tipping over.
- Ensure that the materials used, especially the upholstery, do not contain any harmful chemicals.
- Provide necessary information on maintenance and cleaning of the cover to ensure the longevity of the product.
- Risk of injury from sharp edges or moving parts.
