Article Numbers: 136177, 136176, 136175, 136174, 136173, 136172, 136171, 136170

Safety Instructions:

- Choking hazard due to small parts inside or in the compartments of the cabinet or locker, especially when used by children. Supervision recommended.
- Risk of injury from sharp edges, corners or door use, even with existing safety precautions such as door opening limiters.
- Safety risk if the doors are opened and used incorrectly; be aware of the risk of crushing.
- Risk of corrosion and material damage with unprotected steel or improper care, which can lead to sharp edges.
- High stability of the locker, but improper assembly must be avoided and anchoring checked to prevent tipping.
- Recommendation: Regularly check the hinges, locks, stability and functionality of the safety lock and the door opening limiter.
- Avoid trapping body parts between the door and frame. Take care to prevent injuries when opening the door (max. 100 degrees).
- Use security locks to prevent unauthorised access. Enclose instructions for safe use to prevent loss of keys.
- Ensure regular ventilation to prevent mould growth.
- Suitable for children, but only use under supervision to minimise the risk of falling and injury.
- Avoid improper filling and use of the compartments to prevent the risk of overloading and floor damage caused by plastic glides.
