Safety Instructions:

- Recommended sitting time over 8 hours - take regular breaks.
- Maximum load capacity: not over 110 kg. Take care not to use the chair beyond the recommended load limit.
- There is a risk of injury if used incorrectly.
- Make sure that the chair is correctly assembled to ensure stability and check the mechanism and fixings regularly.
- The armrests can be adjusted in height, width and depth; adjust them correctly to avoid tension.
- No armrests available; retrofitting not possible.
- Backrest provides support for the lordosis and should be adjusted carefully.
- Breathable upholstery ensures comfort, even when sitting for long periods.
- Products should not be placed near extreme heat sources.
- Use upholstery cleaner in accordance with the manufacturer's instructions.
