Safety Instructions:

- Ensure that the table is placed on a stable and level surface to prevent it from tipping over.
- Regularly check the clamping screws and all connecting elements for tightness to ensure safe height adjustment and stability.
- Do not use the table for heavier loads than specified to avoid structural damage. Maximum permissible loads: 200 kg, 250 kg depending on the model.
- Children should not use the table without supervision to avoid the risk of injury from improper use.
- Make sure that the table top is suitable for the respective use, especially in the case of high mechanical or chemical requirements.
- When using electrical appliances, ensure that they are properly earthed to avoid the risk of electric shock.
- Regularly check the table top for damage to ensure safe use.
- Cleaning should be carried out in accordance with the manufacturer's instructions in order to ensure the durability of the tabletop surface.
- Use rubber shoes to protect the floor covering and prevent slipping.
- Avoid contact of the table top with aggressive chemicals to prevent damage.
- When adjusting the height, ensure that no body parts are trapped in order to prevent injuries.
- Avoid loose parts or accessories becoming tripping hazards or small parts being accessible to children.
