Safety Instructions:

- Observe the maximum load of 22 kg to prevent the monitor bridge from tipping over or breaking.
- The table clamp must be properly secured to prevent the product from falling.
- Ensure that the monitors are correctly mounted in accordance with the VESA mounting standards.
- Regularly check the stability of the entire construction and tighten loose parts as required.
- The product application should be carried out by a person with knowledge of the installation and use of such systems.
- Carry out a visual inspection for damage or defects before first use.
- Users should be made aware that the ergonomics of the workstation should be regularly adjusted.
