Safety Instructions:

- Make sure that the table is stable and on a level surface to prevent it from tipping over.
- Ensure that the table height is set correctly to avoid injuries caused by incorrect posture.
- Only use the table for the intended loads and purposes in order to avoid damage.
- Avoid exceeding the load capacity of the table to prevent breakage and injury.
- For height adjustment, the clamping screws must be checked regularly and tightened securely.
- Avoid using the table in damp environments unless the materials are suitable.
- Do not use harsh or aggressive cleaning agents on the tabletop to prevent damage.
- The table is not suitable for use by children and should be placed out of their reach.
- The table top should be checked regularly for damage and wear to ensure that it is safe to use.
- Ensure that all screws and fastenings are correctly and securely fitted.
- Observe protective measures during use, especially during assembly and laboratory work.
- When used in chemical work areas, pay attention to the resistance of the materials.
- Use rubber feet or shoes to protect the floor covering and minimise the risk of slipping.
- Only suitable for commercial use, not for private households.
- For extensions or additional accessories, ensure that they are properly installed.
- Observe warnings and safety instructions to avoid hazards.
- Ensure that all electrical components comply with safety standards, especially in conductive design.
- Wear protective equipment during installation and handling to avoid injury.
- Read and follow all safety information carefully before using the table.
