### Safety Instructions:

- Only use the workbench in a stable, level position to avoid tipping and instability.
- Ensure that all parts and accessories are correctly fitted beforehand and check regularly for damage.
- Only use the workbench for its intended purpose and follow the manufacturer's instructions.
- Keep the working environment clean and avoid obstacles to prevent tripping hazards.
- Wear suitable personal protective equipment such as gloves and safety goggles when working.
- Avoid overloading and observe the maximum load capacity to prevent structural damage.
- Do not leave children unattended or allow them to use the workbench.
- Protection of the workbench against chemically aggressive substances, especially with plastic worktops.
- Observe electrical safety regulations when using electrical tools.
- Only use multifunctional or oiled table tops for compatible applications.
- Regular maintenance and inspection to ensure safety.
- Keep small parts away from children to avoid the risk of choking.
- Avoid use in damp locations to prevent electrical hazards or damage.
- Install and use accessories in accordance with the instructions.
- Careful handling of heavy materials to minimise the risk of injury.
