Safety Instructions:

- Ensure that all cables and electrical components are laid correctly and routed safely in cable ducts to avoid tripping hazards.
- Check that the table is stable, firmly positioned on a stable and level surface and does not wobble to prevent it from tipping over.
- Do not overload the table to avoid damaging the material - observe the recommended load capacity.
- Compliance with the assembly instructions ensures correct assembly and prevents safety risks.
- Beware of sharp edges on the table top and corners to avoid injury.
- Keep the product away from children and ensure that small parts are not accessible to avoid the risk of suffocation.
- Check the table top regularly for damage or loosening, as well as the strength of connections and screws.
- Adjust the height only when the table is switched off and using suitable tools, ensuring that no parts of the body are trapped and that the mechanism functions properly.
- Do not set up the product in damp environments to avoid material deformation; keep away from water, sources of fire and direct sunlight.
- The table cannot be used as a ladder or for tipping loads; store heavy objects in cupboards.
- Optional use of cable ducts to reduce cable clutter and for safety.
- Only use the product after reading the safety instructions and manufacturer's information.
