Article Numbers: 136412, 136411, 136410, 136409, 136408

Safety Instructions:

- The tray must be stored stably to prevent it from tipping over or being damaged.
- Check for damage or cracks before use.
- Suitable personal protective equipment must be used when handling hazardous chemicals.
- The drip tray is only suitable for the storage of aggressive chemicals and substances hazardous to water.
- Improper handling can cause leaks that can lead to serious environmental damage.
- The tray must not be overloaded to avoid overflowing or breaking.
- Suitable for water-polluting substances GHS 1-4. Dispose of the contents in accordance with the regulations for hazardous waste.
- For the storage of aggressive chemicals, use only in suitable, authorised environments.
- Do not store near sources of ignition or heat generation.
- If the sump is overfilled, immediately initiate measures to avert danger.
- Ensure that appropriate protective equipment is worn when handling the tub.
- Not suitable for stackable storage above recommended maximum number.
- Only use for the storage of small polyethylene containers.
- Do not mix with other substances or materials.
- Dispose of safely after use in accordance with local regulations.
