Safety Instructions:

- Choking hazard due to small parts in case of improper assembly or handling. The product is not suitable for children under 3 years of age.
- Ensure that the desk is mounted and used on a stable and level surface to prevent it from tipping over or wobbling.
- Observe the maximum load on the desk to avoid overloading.
- Height adjustment should only be carried out by qualified persons and within the range of 650 to 850 mm to avoid injury.
- Ensure cable management in accordance with the instructions to avoid tripping hazards. Use suitable cable ducts and outlets.
- Before use, ensure that all sharp edges of the desk are covered and checked for damage to prevent injury.
- Carry out the installation in accordance with the enclosed instructions and ensure that all parts are correctly and securely installed and tightened.
- Before installation, ensure that all parts are present and undamaged.
- Product may only be assembled and used by adults; not suitable for children without supervision.
- Not suitable for use in damp environments to prevent damage to the wooden panel.
- To avoid damage, do not bring the table top into contact with sharp or hot objects. The melamine-coated surface protects against scratches and heat.
- The electrical components must be installed securely to avoid the risk of electric shock. Do not use unauthorised cable ducts or accessories.
- When installing, follow the instructions carefully to ensure that all parts are installed correctly and safely. The safety information and installation instructions should be provided in German.
- When adjusting the height, ensure that no body parts are trapped between the moving parts.
