Safety Instructions:

- Pay attention to cable management and cable outlets to avoid tripping hazards.
- Make sure that the height of the desk is set correctly to avoid ergonomic problems and do not exceed the recommended height adjustments (650 to 850 mm).
- The product must be installed in accordance with the instructions to ensure stability and safety.
- Sharp edges may be present; users should exercise caution and children and players under the age of 14 should be supervised.
- Keep the desk away from sources of water to prevent damage to the table top.
- The table must be placed on a stable and level surface, positioned against a stable wall and checked regularly for stability.
- Avoid overloading the table top above the specified maximum load to prevent it from tipping over or being damaged.
- Ensure that all parts are correctly assembled before use and that stability and strength are checked regularly.
- Keep children away from the assembly and installation work.
- Only use the table for its intended purpose and in accordance with the specifications.
- When adjusting the table height, ensure that no body parts are trapped.
- To avoid the risk of electric shock, electrical appliances should only be connected by authorised specialists.
- Take care not to use any heavy or sharp objects directly on the tabletop to prevent scratches or tipping over.
- Carefully read and observe all safety information and warnings supplied with the product.
- Keep electrical appliances at a safe distance and ensure appropriate wiring to avoid fire hazards.
- Do not make any changes or modifications to the product that could affect safety.
- If the product is damaged, stop using it immediately and contact the manufacturer.
