Safety Instructions:

- Ensure that the table is placed on a stable, level surface to prevent instability, tipping or overturning.
- Avoid using the table in damp environments and keep it away from water to prevent damage.
- Ensure that all cables are laid neatly and securely and use cable outlets to avoid tripping hazards.
- Ensure that the table height adjustment is carried out correctly and without excessive force in order to avoid accidents and damage.
- Keep the table away from heat sources to prevent damage to the surface.
- Avoid overloading the tabletop, as this can impair stability and cause it to tip over.
- The table should only be used within the intended framework and should not be misused as a climbing device or seat in order to minimise the risk of injury.
- When adjusting the height, ensure that no parts of the body are trapped in order to avoid injuries.
- Only use the table on stable, level floors to avoid the risk of tipping.
- It is important to ensure that adjustable parts and connecting elements are correctly fixed to ensure safety.
- Follow the installation instructions exactly to avoid damage and injury.
- Children should not use the table without supervision to prevent injury.
- Use recommended cleaning agents and do not wipe the table top with aggressive substances to protect the melamine surface.
- Regular inspection of stability, height adjustment, levelling screws and mechanical parts in order to detect safety defects at an early stage.
- Install protective measures such as edge protection to minimise the risk of injury.
- Exceeding the maximum load may lead to instability and risk of damage.
- Ensure the use of suitable mounting materials to guarantee stability.
