Safety Instructions:

- The table height should not be set above 850 mm and should only be used by adults to avoid the risk of falling and to ensure an ergonomic sitting posture.
- Ensure that the appliance is stable on a level and firm surface to prevent it from tipping over and causing injury. Use floor levelling screws and check them regularly.
- Ensure that there are no loose parts. All screws and connections must be firmly tightened to ensure stability.
- Avoid loading the tabletop beyond the recommended maximum load capacity to prevent damage and accidents.
- Protect the table top from sharp objects to prevent scratches and damage. Keep the surface clean and dry to avoid damaging the materials.
- Be careful when using the cable aperture to avoid tripping hazards. Make sure that no cables protrude or are damaged.
- The table is not suitable for extreme conditions (e.g. high temperatures, moisture). Keep the table away from liquids.
- Ensure that children and animals are kept away during assembly and use to avoid injury. The table is not a toy.
- Observe all installation and usage instructions to prevent injury and damage. Only use safely in accordance with the instructions.
- Children should be supervised during assembly and use to minimise the risk of injury.
