Safety Instructions:

- Ensure that the desk is stable enough to support the specified maximum weight of 60 kg dynamic and 100 kg static.
- When using the electrically height-adjustable mechanism, ensure that no body parts or objects become trapped.
- Check electrical components regularly for damage to avoid risks such as short circuits or electric shock.
- Install the power supply out of reach of water sources and disconnect when not in use.
- Avoid contact with water and other liquids to protect electrical components.
- Read the operating instructions carefully and follow them. Include safety instructions for using the electric height adjustment mechanism.
- Only use accessories and compatible combinations recommended by the manufacturer to ensure stability and safety.
- Check for damage or defects before use and do not use if there is visible damage.
- Lay all cables neatly to avoid tripping hazards and prevent damage.
- Keep children and pets away from the table, especially during height adjustment, to minimise the risk of injury.
- The desk is not suitable for use by children under 14 years of age. Small parts could pose a choking hazard.
- Keep the control unit and the electrical components away from water and moisture.
- Guide the cable through the designated openings to avoid the risk of tripping.
- Do not use the product if there is visible damage to the electrical equipment.
- In the event of electrical faults, disconnect from the power supply immediately and contact the manufacturer.
- Activate the childproof lock and install the control panel out of the reach of children.
- Keep the work area free of obstacles to prevent injuries.
- The table must be set up on a stable, level surface to avoid the risk of tipping.
- Use the product in accordance with the instructions and ensure that all safety regulations are observed.
- Carry out regular maintenance and inspection of the electrical components to ensure long-term safety.
