Safety Instructions:

- Ensure that the desk height is set correctly to avoid ergonomic and health problems.
- Check the stability and safety of the table frame before use and regularly check the screws and connections for tightness to prevent wobbling or tipping.
- Ensure that no objects or cables obstruct the workplace to avoid tripping hazards. Cables should be properly routed and secured with cable outlets.
- Care should be taken when adjusting the height of the table to avoid crushing injuries. Keep fingers and body parts away from moving parts.
- The table is designed for a maximum load of 100 kg. Do not exceed this limit to avoid tipping over or damage.
- Keep the table away from water and moisture so as not to damage the melamine resin coating.
- Avoid contact of the surface with abrasive or chemical cleaners to prevent scratches or damage.
- Make sure that the table is placed on a stable and level surface to prevent it from tipping or wobbling.
- Assembly and use should be carried out in accordance with the manufacturer's instructions in order to minimise injury. Ensure that all parts are correctly fitted.
- Keep the desk at the recommended height to avoid back injuries and ergonomic problems.
- Make sure that the table is stable and that the table top is firmly mounted to prevent it from tipping over.
- The product should be kept away from children to avoid injury from improper use. Small parts can pose a choking hazard.
- Regular inspection for wear or damage, especially to the height-adjustable parts, is recommended to ensure safety.
- Before first use, assembly should be carried out in accordance with the instructions and all connecting elements should be checked for tightness.
- Avoid overloading the tabletop beyond the load capacity recommended by the manufacturer to prevent damage to the product.
- The table should only be used as a work table in office environments.
