Safety Instructions:

- Ensure that the table has been designed and manufactured in accordance with safety regulations and is accompanied by clear, understandable instructions in German.
- The table should be placed on a stable, level surface to prevent it from tipping over.
- The load-bearing capacity of the table frame should be monitored to prevent it from tipping over or breaking under load.
- Only use recommended accessories and avoid overloading in order not to jeopardise safety.
- Installation should only be carried out by specialised or qualified personnel.
- Regularly check the stability and strength of the table legs and fixings.
- Keep hot objects or liquids away to avoid material damage and fire hazard.
- Avoid accessible sharp edges to reduce the risk of injury.
- Do not allow children access to small parts during assembly and use and supervise use by children under 14 years of age.
- Before use, check that the table is stable and correctly assembled and that all screws are tight.
- Ensure that no loose cables or components cause tripping hazards and use cable outlets for organised cable routing.
- Only use the table for its intended purpose.
- Read and follow the manufacturer's instructions before installation.
- Desk tops made of three-layer chipboard can break if handled incorrectly and sharp edges of the desk frame could pose a risk.
- Protect the table from direct sunlight, water sources and heating appliances to prevent material changes and damage.
