Article Numbers: 401129, 401128, 401127, 401126, 401125, 401124, 401123, 401122, 401121, 401120

Safety Instructions:

- Avoid the risk of crushing and injury by using the single pull-out stop to prevent several drawers from opening at the same time.
- Ensure that the product is not used unsupervised by children to avoid misuse and injury.
- Do not load each drawer with more than 35 kg to avoid overloading.
- Take care when closing the drawers to avoid injury.
- Make sure that the cylinder lock works properly to prevent unauthorised access.
- Secure the product with a cylinder lock and central locking system to protect against theft.
- Drawers can be pulled out up to 80%; use caution to prevent them from falling over.
- Watch out for sharp edges and corners on the housing, which is made of solid, reinforced sheet steel, to avoid cuts.
- Mount the product on a stable and level surface to reduce the risk of tipping.
- The product is not designed for use by children; there is a risk of suffocation if handled incorrectly.
- Keep keys out of the reach of children to prevent unauthorised access.
- The drawer bases are designed for use with PROFI workbenches with a depth of 700 mm.
- Make sure you use the correct lifting technique to avoid back injuries when lifting the heavy substructure.
- Regularly check the stability of the base and drawers to ensure safety.
