Article Numbers: 401169, 401168, 401167, 401166, 401165, 401164, 401163, 401162, 401161, 401160

Safety Instructions:

- Avoid risk of injury from opening several drawers at the same time, especially if the individual drawer stop does not function properly.
- Risk of suffocation if used incorrectly or if small parts are stored unsafely; use a cylinder lock to prevent unauthorised access.
- Do not exceed the maximum load of the drawers (35 kg per drawer). Take care not to place excessive loads in the drawers during operation to avoid structural damage.
- Avoid contact with water to prevent electrical damage. Keep the product away from water and extreme temperatures to maintain material integrity.
- Only use the product for its intended purpose and in the appropriate context to avoid injury.
- Ensure that the drawer container is installed in a stable and secure base to prevent it from tipping over.
- Provision of clear instructions for safe operation in understandable language to prevent injuries.
- Check the product regularly for damage, especially the housing and drawers, to minimise safety risks.
- Only use the keys provided for the cylinder lock to prevent unauthorised access.
- Only pull out drawers individually and completely to avoid the risk of crushing and injury.
- Ensure that suitable protective devices are in place, especially in hazardous environments, and that the site is well lit to prevent accidents.
- Protect the area around the workbench by keeping the drawers and floor free of obstacles.
- Children should be kept away from using the product and operation is only recommended under adult supervision.
- Beware of sharp edges and corners during assembly. Wear suitable clothing to avoid injury.
- Ensure that the base is securely and firmly installed on the workbench to prevent it from tipping over.
