Article Numbers: 401179, 401178, 401177, 401176, 401175, 401174, 401173, 401172, 401171, 401170

Safety Instructions:

- Caution: Risk of injury if several drawers are opened at the same time. The drawers are equipped with an individual pull-out stop to prevent the risk of crushing. Ensure that the single pull-out stop works properly.
- Maximum load per drawer: 35 kg. Avoid overloading to prevent damage.
- Keep the key safe to prevent unauthorised access. Use the cylinder lock to secure the tools against theft.
- Only use the drawers for their intended use on PROFI workbenches with a depth of 700 mm. Ensure correct assembly to avoid stability problems.
- Keep children away as the drawer bases are not designed for their use. Take safety precautions.
- Make sure that the drawers are clean and free of obstructions to ensure smooth opening and closing.
- The housing is made of solid sheet steel. Avoid sharp edges and carry out regular checks to prevent safety risks.
- Drawers should only be pulled out up to 80 % in order to maintain balance and prevent the furniture from tipping over.
- Do not use the drawer substructure as a step or for stabilisation.
- Regular inspection of the drawer bases for damage is recommended.
- Risk of injury due to improper use of drawer bases and heavy tools.
- Improper installation could result in instability; observe the installation instructions.
- Contains small parts that could be dangerous for children. Keep out of the reach of children.
- Report any safety problems to the manufacturer immediately.
