Safety Instructions:

- Observe the maximum load capacity of 120 kg to avoid overloading and instability.
- Use only for the intended purpose and do not use as play equipment.
- Suitable for use in workshops or industrial environments; users should be appropriately trained.
- Ensure that all components are secured in accordance with the instructions and regulations to ensure stability.
- Before each use, check that all fastenings are tight and that there are no visible defects.
- Use the height-adjustable components with care; ensure that the structure is stable when adjusting the height.
- Not suitable for use by children without supervision; small parts must be kept out of the reach of children.
- Recognise and avoid sharp edges or corners, take care when handling.
- Take particular care to avoid electric shock when working near electrical appliances or water sources.
- Avoid overloading the structure to minimise damage and hazards.
- Only use the intended fastening elements and tools; wear suitable protective equipment.
- To minimise the risk of corrosion, do not use the product in damp or steamy environments.
- Ensure regular inspection for wear and damage to guarantee safety.
