Safety Instructions:

- Maximum load capacity: Do not exceed 120 kg to avoid structural damage or injury.
- Only use in conjunction with extension tables from the Universal Standard and Profi Standard series; suitable depth 700 mm.
- Before assembly, ensure that the mounting gantry is correctly and stably attached to the extension table to prevent it from wobbling or tipping over.
- Do not use products in the vicinity of children; choking hazard due to small parts.
- Read the installation instructions carefully and follow them to ensure safety.
- Carry out installation and use in accordance with the manufacturer's instructions.
- Use suitable protective clothing during assembly to prevent injuries.
- Regularly check the stability and safety of the structure.
- Ensure a stable and level surface for using the product.
- Do not make any unauthorised changes or apply excessive loads to the structure in order not to endanger safety.
- Observe safety precautions when attaching tools and devices.
- Use the product out of the reach of children unless supervised.
- Assembly and installation should be carried out by qualified personnel.
- Check the maximum load capacity of the assembly portal and do not exceed it in order to avoid safety risks.
